

ALOFT® IS NOW LABELED FOR USE ON FIRE ANTS

ALOFT offers season-long control of Red Imported Fire Ants with quicker knockdown than Top Choice™

- **Season-Long Control of Fire Ants**
- **Rapid Knockdown Within 7 Days**
- **Can Be Used as a Fall Preventative**
- **Easy and Quick to Apply**
- **Ready to Use**
- **Recommended for Home Lawns, Golf Courses, Athletic Fields, Schools, Playgrounds**

You trust ALOFT® Insecticide for best-in-class, season-long control of all major turfgrass insects* with one application. **And now the EPA has approved ALOFT LC SC and ALOFT GC SC for Red Imported Fire Ant control.**

ALOFT combines two modes of action with a unique formulation that knocks down Red Imported Fire Ants within 7 days and keeps them down with long-lasting residual activity.

Application

For control of Red Imported Fire Ants: 0.46 fl oz per 1,000 sq ft (20 fl oz/A)

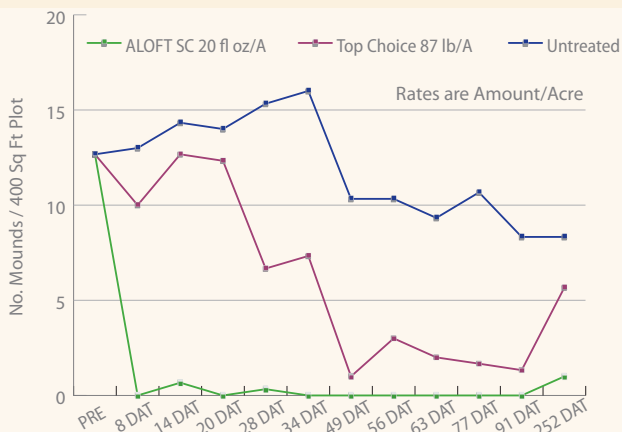

If the soil is not moist, irrigate before application or use a high volume application. For mound treatments, use one teaspoon per gallon of water (14.4 fl oz/A in 87 gallons of water) and apply 1-2 gallons of finished spray per mound. The solution should be applied in such a manner to allow the solution to move into the mound. Also treat a 4-foot diameter circle around the mound. Apply in cool weather (65-80° F) or in early morning or late evening hours when most of the foraging workers are in the colony.

UNIVERSITY TRIALS PROVE ALOFT® EFFECTIVENESS ON FIRE ANTS

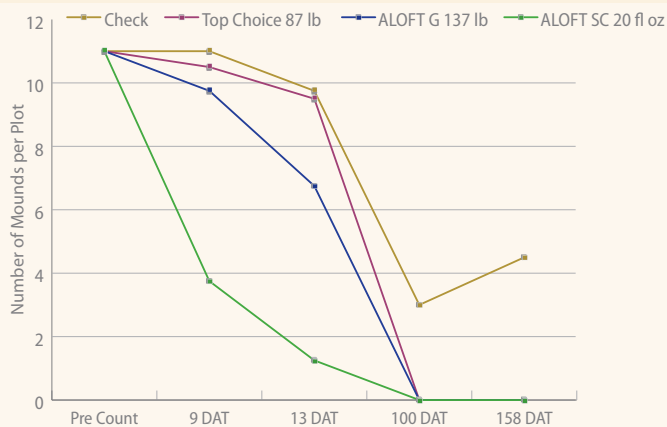

In studies conducted at the University of North Carolina and University of Florida, ALOFT was proven to be effective as a preventative treatment of fire ants in the Fall and as a Spring rescue treatment. Studies also showed ALOFT provided faster knockdown than Top Choice™ insecticide.
