

Proven Protection from Bud Break to Pre-Harvest

Arysta LifeScience is pleased to bring you our portfolio of innovative and trusted crop protection products that can be used effectively on their own or in rotation with your current products, to create a more proactive resistance management program in your grapes.

Ph-D[®]

Elevate[®]

Kanemite[®]

Captan

PH-D[®]

A broad-spectrum fungicide with a unique mode of action, PH-D (polyoxin-D) provides a higher degree of Gray mold control, in addition to several secondary rot organisms in grapes, and is an excellent addition to a resistance management program.

ELEVATE[®]

ELEVATE Fungicide features fenhexamid, a unique active ingredient that provides effective control of *Botrytis cinerea* (Bunch rot) and suppression of Powdery mildew.

KANEMITE[®]

For effective control of damaging mites in grapes, KANEMITE (acequinocyl) has a unique mode of action that provides rapid knockdown and long-lasting residual activity on key mite species while being easy on beneficial species.

CAPTAN

Available in three formulations, CAPTAN Fungicide sets the standard for reliable fungicide protection, from bud break to pre-harvest. With a multi-site mode of action, CAPTAN is an excellent fit in a resistance management program.

Recommended Application Timing

Product Specifications and Usage

	ACTIVE INGREDIENT	SIGNAL WORD	REI	PHI	RATE(S)/A	MAX USE PRODUCT/A/SEASON
