

The Arysta LifeScience Product Portfolio for Cereals

Our portfolio for the cereals market has expanded, and we now offer a comprehensive lineup of integrated solutions that take you successfully from planting to harvest.

Rancona® V RTU SEED TREATMENT

The advanced generation seed treatment technology and three powerful fungicides in RANCONA® V RTU ensure you're maximizing your seed treatment investment and yield potential.

Rancona® Crest SEED TREATMENT

Powerful combination of two fungicides with an insecticide which is delivered with the highest load rate of any RTU seed treatment for maximum yield potential in cereals.

Pre-Pare® HERBICIDE

Extend your glyphosate burndown with residual control of grassy weeds in spring wheat and bromes in winter wheat that can rob moisture, nutrients and yields.

Everest® 2.0 HERBICIDE

Dependable **Flush after flush**® control of hard-to-kill grass and broadleaf weeds combined with best-in-class crop safety.

Supremacy® HERBICIDE

Best-in-class, post-emergent control of more than 70 broadleaf weeds, including ALS-resistant and glyphosate-resistant biotypes.

Audit® 1:1 HERBICIDE

Dependable choice for post-emergent control of tough broadleaf weeds.

Audit® 4:1 HERBICIDE

Reliable, post-emergent control of broadleaf weeds, with the added benefit of a flexible crop rotation schedule.

NextStep® NG HERBICIDE

A next-generation clodinafop with built-in adjuvant that offers a one-pass solution to grassy weeds in wheat.

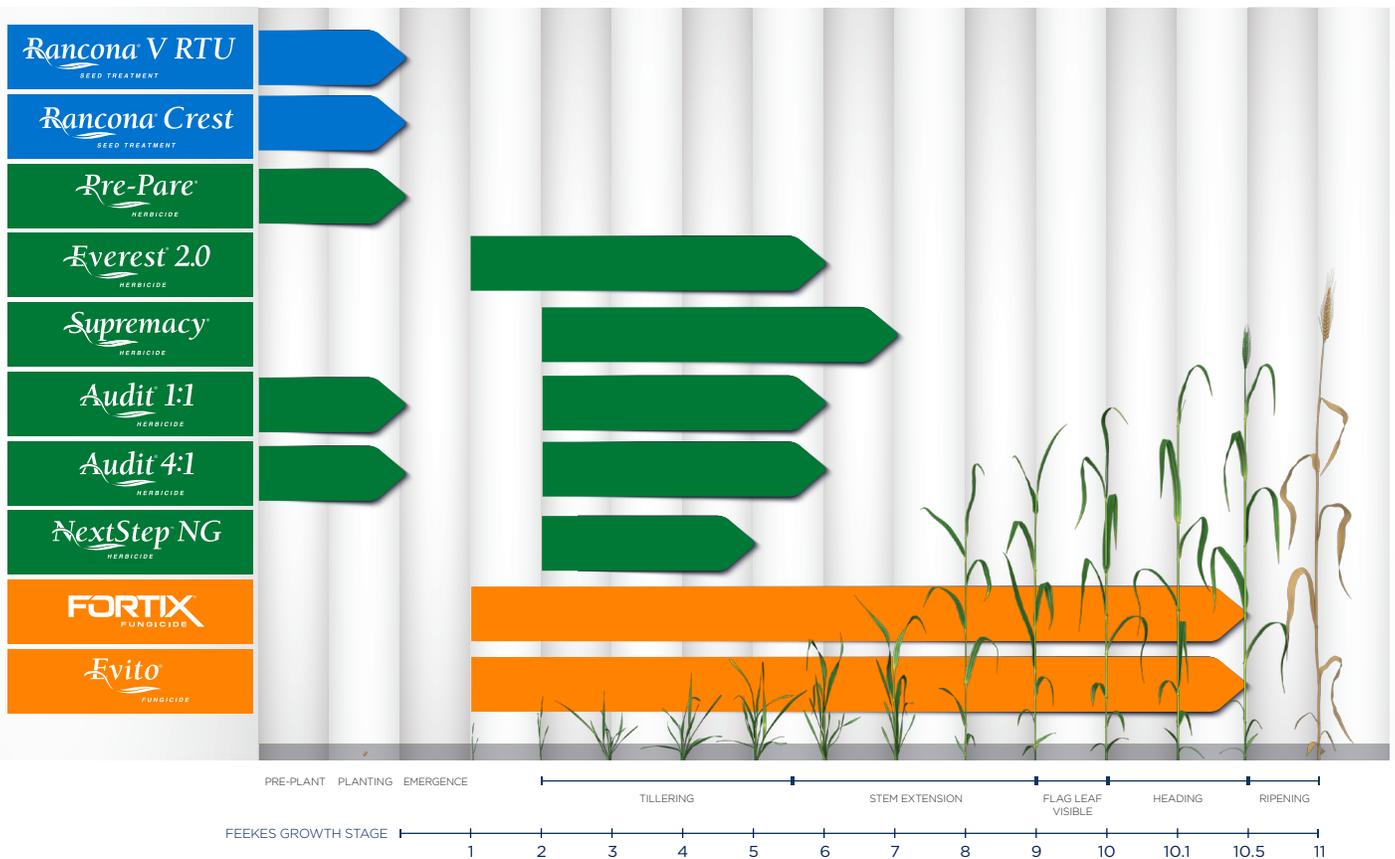

FORTIX FUNGICIDE

A highly systemic, fast-acting strobilurin combined with a highly systemic triazole for maximum flag-leaf coverage and maximum yield in spring and winter wheat.

Evito® FUNGICIDE

Highly advanced, highly systemic strobilurin with quick uptake and residual soil activity for long-lasting disease control in cereals.
