

RANCONA[®] TRIO TAKES SEED TREATMENT TECHNOLOGY TO NEW LEVELS

With advanced generation seed treatment technology and multiple modes of action, RANCONA[®] TRIO ensures you're maximizing your seed treatment investment and maximizing your yield potential.

HIGH-PERFORMANCE PROTECTION

Three powerful fungicides in RANCONA TRIO give you a multi-mode combination with both contact and systemic activity for maximum protection against a broad-spectrum of seed and seedling diseases in cereals.

We start with ipconazole, a highly active and novel triazole that controls *Rhizoctonia solani*, *Fusarium*, smuts, bunts and seed rots. Then we add Carbathiin, the original SDHI chemistry, adding to the fungicidal activity and supporting early seedling vigour and growth. And finally, metalaxyl, a foundation fungicide that broadens the disease spectrum to include *Pythium*.

SUPERIOR FORMULATION TECHNOLOGY

RANCONA flowable application technology provides superior coverage and adhesion, so more active ingredient ends up on your seed and not your equipment, delivering more consistent protection under a wider range of conditions.

DISEASES CONTROLLED

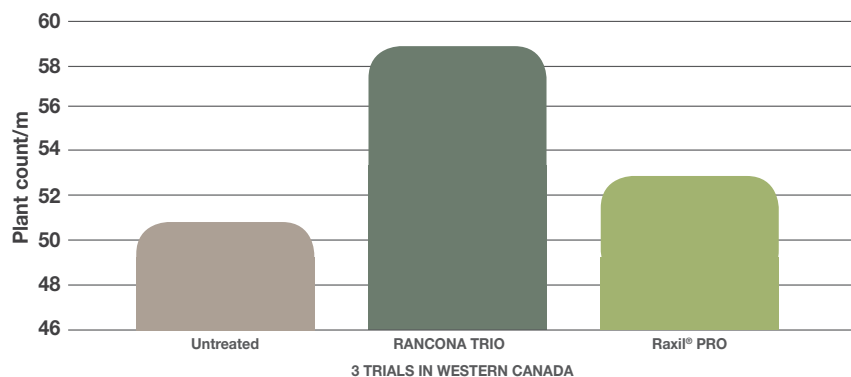

- *Rhizoctonia solani*
- *Fusarium spp.*
- *Cochliobolus sativus*
- Smuts, bunts
- General seed rots (*Aspergillus* and *Penicillium*)
- *Pythium*

THE POWER OF THREE FOR MAXIMUM PROTECTION

- Three active ingredients create a multi-mode combination for maximum protection against a broad-spectrum of seed and seedling diseases
- Strong contact and systemic activity, controls diseases in wheat, barley, oats, triticale and rye
- Exceptional safety to seeds
- Improved crop emergence, increased stands and healthier, more vigorous plants
- Easy-to-use (ETU) formulation – no dilution required, less sticking/clumping, low dust levels, minimal buildup on equipment, easy clean up, lower freezing point

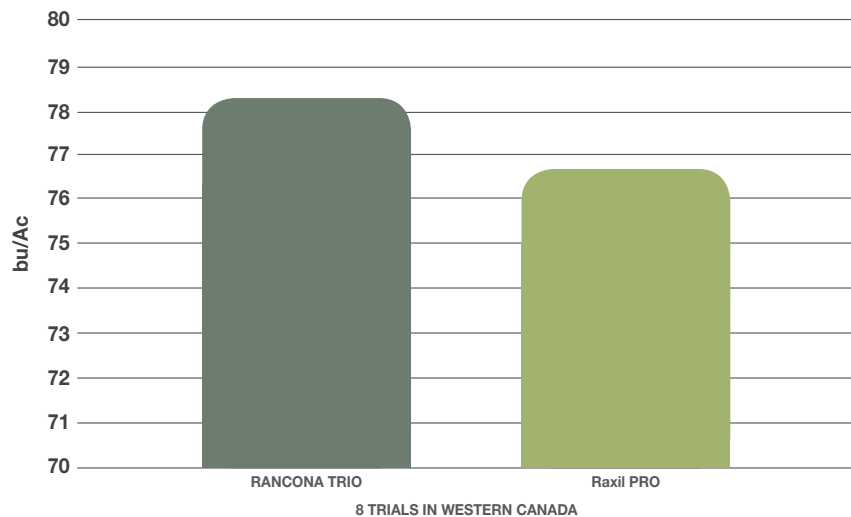

2017 RANCONA TRIO FIELD TRIALS

PLANT POPULATION

In three side by side trials in Western Canada, RANCONA TRIO delivered a 15% increase in plant population over the untreated check, and a 10% increase over Raxil PRO

YIELD

In eight side-by-side trials across Western Canada, RANCONA TRIO averaged a 2 bu/Ac increase over Raxil PRO
